

Payment Services

E-commerce acquiring

Online payment solutions need to be simple, quick and secure

SIX Payment Services

Your key to successful online business

Do you wish to offer card payments in your online shop and boost your sales? Do you already have an online shop and wish to target customers worldwide? Do you find it difficult to assign customer orders in statements from your acquirer?

SIX is your comprehensive expert for acquiring

The credit card remains the favorite means of payment in the online world. As licensee to various card organizations, SIX provides comprehensive cashless payment services. This is based on an acceptance contract you conclude with SIX for MasterCard, Visa and Maestro.

SIX has the solution

We offer maximum flexibility with no minimum contract periods for acceptance contracts, opportunities for boosting e-/m-commerce sales, as well as the highest security standards and dependable systems. Whether you have domestic or international customers, or you process subscription payments – we have a customized solution for you.

How SIX benefits you

- Many years of experience and dependable partner for acquiring
- Extensive reporting options
- Foreign currency service
- Card acceptance in remote sales for e-commerce and mail order, as well as solutions for high street stores
- Acceptance contracts for credit and debit cards in the event of international expansion
- Omni-channel acquirer for online sales as well as sales on all mobile devices
- Secure payments due to PCI DSS (Payment Card Industry Data Security Standard)

Services

- 3-D Secure payments for e-commerce (MasterCard SecureCode, Verified by Visa, Maestro SecureCode) for increased payment security and protection against abuse
- Dynamic description: additional information on the cardholder statement gives your customers useful information about the order (e.g. order number) – resulting in greater customer satisfaction.
- Recurring payments: in the case of subscriptions, the customer only needs to enter card data once. Data is safely stored and can be used for ongoing services.

Reporting

– Simple overview

Use the merchant payment data reconciliation in XML or CSV format for clear transparency and assignment of all payments. The MRX-File gives you a quick, simple overview of all credit and debit card payments as well as all other transactions. In addition, it makes reconciliation with accounting easy and provides absolute transparency.

– myPayments merchant portal

Get a clear overview of all transaction-related information.

– Additional data

Assign payments to the relevant orders by transferring additional data for specific order information, such as for online shops and airlines. This will reduce your accounting workload.

Foreign currency service

Reach your customers throughout the world. With SIX you can enable customers to pay in their own currency and have turnover paid out in the desired currency.

€	Euro
£	Pound sterling
\$	US dollar
¥	Japanese yen
₽	Russian ruble
CHF	Swiss franc
₺	Turkish lira
...	85 others

Payment service provider (PSP)

An online shop is connected to SIX via a payment service provider (PSP). This guarantees compliance with strict security standards for online card payments.

SIX currently works with the following payment service providers: PayUnity, Saferpay, mPAY24, Viveum, Ingenico ePayments, Kalixa, Wirecard and Datatrans.

We'll be happy to advise you about the cashless payment solution tailored to fit your needs.
