Features of the e355 MOBILE PINPAD

- Can be integrated into your payment environment with the SIX Payment Services TIM interface
- Integration support from SIX Payment Services
- Use a cost-effective and mobile payment terminal for card acceptance anytime via an existing cash-register infrastructure
- Mobile and flexible to use thanks to WiFi and Bluetooth connection

Card acceptance

Today, paying with card is a given for your customers. That's why a broad acceptance of credit and debit cards and mobile payments (TWINT, Apple Pay, Samsung Pay, etc.) is the most important thing when it comes to cashless payments.

SIX Payment Services offers you the most common credit and debit cards from one provider for your payment terminal in your shop or in your online shop. The more payment options you accept, the greater your prospect of an increase in sales and spontaneous purchases.

myPortal – the online customer portal

Everything at a glance. Stay in control of transactions and settlements. 24/7, worldwide and free of charge! myPortal provides you with a structured overview of your transactions and payments and important details about your terminals. myPortal also offers optimal support for your business processes. What is more, all the latest data is clearly displayed on the homepage. Carry out your own analyses based on the data provided.

DCC – Dynamic Currency Conversion

Dynamic Currency Conversion (DCC) from SIX Payment Services allows your international clientele to feel at home when paying.

Your payment terminal recognises foreign cards automatically with DCC and immediately gives your customer the option of paying in their home currency. With just the press of a button, they can choose which currency they would like to use for the purchase – be it their home currency or Swiss Francs.
