7.1	Saferpay Sales Team.....	5
7.2	Saferpay Integration Team	5
7.3	Saferpay Support Team	5

1 Diners as a means of payment at SIX Payment Services in Austria

SIX Payment Services can now process Diners as a means of payment in Austria.

2 Support for TWINT payments in shopping apps

Saferpay provides merchants with support in integrating TWINT into their own apps. It is now easy for shoppers to switch directly from the shopping app to the TWINT app to pay and then switch back again once the payment has been made.

3 Transaction identification reference in reconciliation files

Customers with acquiring contracts from SIX Payment Services can now easily identify transactions in the reconciliation files (for example as PDF or MRX files) by entering their own reference number (Parameter *Transaction.OrderId* in JSON API).

As it is sometimes impossible or too expensive to adapt the software used by merchants, Saferpay now transmits the transaction identification value (Parameter *Transaction.OrderId* in JSON API) to the acquiring system if no other reference number has been provided.

4 Additional filters and search options in Secure PayGate Journal

The filtering of offers in the journal of the Pay-by-Link interface, Secure PayGate, has been further optimised.

If multiple Secure PayGate terminals are been used, the list can now be limited to a particular terminal in order to view the content and status of an offer more quickly. The terminal used and the terminal description are therefore now also included in the list.

The inclusion of the search fields “created by” and “changed by” makes it easier to search for a particular offer. You can find all the details about the search fields in the Tooltip by moving the mouse over the information symbol.

5 E-mail reminder before account lockout when users are inactive

For security reasons, user accounts for accessing the Saferpay Backoffice are locked if the account is not used for 180 days. After this period, you need to contact the support team to have the user account unlocked having reviewed the individual case.

In some circumstances, for example when sales activities occur on a seasonal basis, this lockout creates unnecessary hassle, both for the merchant and SIX Payment Services. In order to prevent lockouts, SIX Payment Services will inform affected users by e-mail 10 days before their account is locked and remind them to log in.

Please note that passwords for user accounts must be changed after 90 days.

6 JSON API test with an individual test account

For some time now, SIX Payment Services has been offering the option of creating an [individual test account](#) to test the broad variety of functions provided by Saferpay in the Saferpay test environment. Therefore, the access data for the JSON API that is linked to the general test account will be deleted on 30 April 2019. Following this, it will only be possible to test the JSON API using an individual test account.

At this point, you will only be able to use the general test account for tests with the outdated interfaces, https Interface and Client Application Interface, and this account will be deleted entirely at the end of 2020. In this regard please see the [FAQ page regarding the migration to the Saferpay JSON API](#).

7 Contact

7.1 Saferpay Sales Team

Would you like to activate a new product or payment method for your account?
If so, contact our sales team from Monday to Friday between 9 am and 5 pm.

	Telephone	E-mail
Switzerland/ International	+41 58 399 92 32	e-commerce@six-payment-services.com
Germany	+49 40 325 967 260	e-com.de@six-payment-services.com
Austria	+43 1 717 01 63 74	e-commerce.austria@six-payment-services.com

7.2 Saferpay Integration Team

Do you require assistance with the technical integration of Saferpay?
If so, contact our Integration Team:

E-mail: integration.saferpay@six-payment-services.com
