

Swiss Hospitality Solution

How to benefit from the synergies of several systems

The Swiss Hospitality Solution combines the advantages of five separate systems to create a fully integrated package. This gives you and your customers a future-looking, flexible and reliable solution for the efficient handling of card payments.

Integration makes it even easier to handle debit and credit cards. You and your customers benefit several times over - from faster payment processing, greater security and clearer bills.

Terminal integration gives you benefits across the board – in terms of finance, time and customer demands.

How you benefit at first:

- Everything from a single source: terminal, acquiring and one interface to the leading front office systems
- Fidelio Opera/Fidelio Suite 8
- Intuitive user prompting, little training required
- Full integration: no input errors or duplicated entries

How you benefit if you used to have a stand-alone solution:

- Time-saving: no entries made on the terminal
- Clear: modern online reporting
- Cost-effective: existing, new generation ep2 terminals can be upgraded

- Efficient: automatic authorization at check-in
- Intelligent: automatic reservation increase during the stay
- Transparent: a single, all-inclusive bill for the guest

How you benefit if you already use an integrated solution:

- DCC: lower commissions thanks to automatic currency conversion
- Greater security with Chip&PIN technology
- EMV/ep2: facilitates modern chipcard payments
- All debit and credit cards in a single solution

Your guests benefit as well:

- Payment in their own currency (card currency)
- Simple, convenient payment
- Easier, clearer expense settlement
- Immediate clarity on the amount to pay
- Beneficial exchange rate

Everything from a single source

Acquiring

More than four million credit cards and five million debit cards are in circulation in Switzerland alone. You too can accept the most common credit cards in the world: Visa, MasterCard, Diners Club, Discover, UnionPay and JCB, and Maestro, the most frequently used debit card in Switzerland. With SIX Payment Services as your partner, you can count on the integrated, simple and secure handling of payments. We accompany and support customers throughout Europe.

Value added services

Our additional services provide new ways for you to tie in existing customers and acquire new customers. Innovative add-ons enable you to offer your customers even better service. Dynamic Currency Conversion (DCC), for instance, enables international customers to settle bills directly in their home currency.

Payment terminals

The Chip&PIN terminals cover all your needs in the field of cashless payments. All our terminals meet the strict standards set by the international card organisations. The terminals operate in conjunction with POS systems and state-of-the-art data communications. In addition to permanently installed devices, we

also offer a mobile solution for restaurant or outdoor scenarios that communicates over your WiFi network or the GPRS mobile network.

3C Integra

3C Integra is a fully integrated credit card solution running under the leading PMS systems, Fidelio Opera and Fidelio Suite 8. It can be used on your front office system to handle credit and debit card payments. 3C Integra ensures maximum security and helps to counter credit card fraud thanks to Chip&PIN technology. The encrypted internet protocol renders credit card handling even faster and more secure. The web-based reporting tool makes it easier for you to monitor and consolidate payments. 3C Integra relieves you of time-consuming administration work, leaving you more time and energy for your customers.

Hotel PMS system

Leading hotel PMS systems like MICROS-Fidelio, Protel offer tried-and-tested, customized, all-in-one solutions, comprising software and hardware components that are supplemented by a service package. More than 310,000 catering outlets and 25,000 hotels around the world employ MICROS-Fidelio applications. The Swiss Hospitality solution runs under both Fidelio Opera and Fidelio Suite 8.

Terminal integration

With terminal integration, you have three market-leading service partners at your side – 24 hours a day, 7 days a week if you wish – to answer any question you may have.

Specialists are on hand to install the payment terminals and instruct you in their use in your premises. If needed, existing terminals like the yomani or the xenta can be upgraded quickly and efficiently. We recommend the use of an autonomous terminal if you wish to enjoy profitable additional services or to carry out backups.
