

PACKS

The easy way to accept payments

Take advantage of included card acceptance and a payment device at transparent prices.
Choose the Pack that suits you best.

For small and medium-sized companies we provide two all-in-one packages to facilitate the acceptance of cashless payments. The two packs meet the most required payment solution of the Polish market so that you do not need to bother about individual decisions but to only choose the pack that suits your business.

Let your customers pay conveniently, quickly and securely directly via a payment device. Either you use your existing Android device and turn it to a payment terminal (SoftPOS) or you choose a classic, modern payment terminal. And with both packs you are able to accept most popular card payments.

YOUR PACK INCLUDES

Start accepting card payments now. It has never been easier with the Pack that covers it all.

- ✓ **Card acceptance (commission rates decreasing based on volume)**
- ✓ **Payment device**
