

BLIK

A convenient and secure mobile payment solution

Mobile payments are growing in popularity and the acceptance of mobile wallets is increasing rapidly among merchants and consumers. With over 12.9 million active users, BLIK is one of the most popular mobile payment solutions in Poland. By accepting BLIK you are offering a secure and easy mobile payment method to your customers.

BLIK is easy to integrate and enables mobile payments at the point of sale. With Worldline as BLIK's preferred partner in Europe, you can easily offer your customers one of their most preferred mobile payment methods – without any additional infrastructure.

Merchant benefits

- No additional infrastructure – your customers pay with their smartphone
- New customer potential – any customer with a Polish bank account can use BLIK
- Secure and risk-free payment method
- Low transaction fees and processing costs

Customer benefits

- Convenient, cashless and contactless payment
- Secure payments within seconds
- Embedded in mobile bank applications

Accept payments with BLIK now

BLIK at the terminal

BLIK works with all our ep2 devices – whether these are stationary or mobile, integrated into the cash register or standalone. The customer only needs to generate a six-digit BLIK code in the banking app, enter it on the terminal and then confirm the transaction in the app. This is a convenient and intuitive way of making cashless payments which also ease the sales process.
