

Masterpass

The secure wallet solution for easy payment

Masterpass™ is the digital payment solution from Mastercard, with which your customers can securely, quickly and conveniently pay at thousands of online shops - from anywhere and with any standard device; whether it is a smartphone, tablet or computer. All payment data and delivery addresses in the digital wallet are protected by multiple layers of security and are transmitted in an encrypted form. SIX Payment Services is following the trend of the new wallet solutions and offers you Masterpass as a new method of payment for your online shop.

Time-consuming data entry is a thing of the past. Your customers only need to register once with Masterpass and can complete all of their orders in future with just a few clicks. Registration can be carried out straight away during the payment process: online with all participating banks or directly at Masterpass.com.

3 steps to Masterpass

This is how easy it is for your customers:

1. Register free of charge, even during the payment process
2. Create a profile with personal data
3. Enter delivery addresses and card data once and you can get started

Which cards does Masterpass work with?

All standard payment cards can be stored in the wallet, e.g.:

- Visa
- Mastercard
- Maestro
- American Express
- Diners Club International
- Discover Card
- JCB

Advantages for your customers

- ✓ All data is reliably protected thanks to Mastercard
- ✓ Convenient online payments from anywhere and with any standard device
- ✓ Shortened checkout process as card data is stored

What do Masterpass transactions cost?

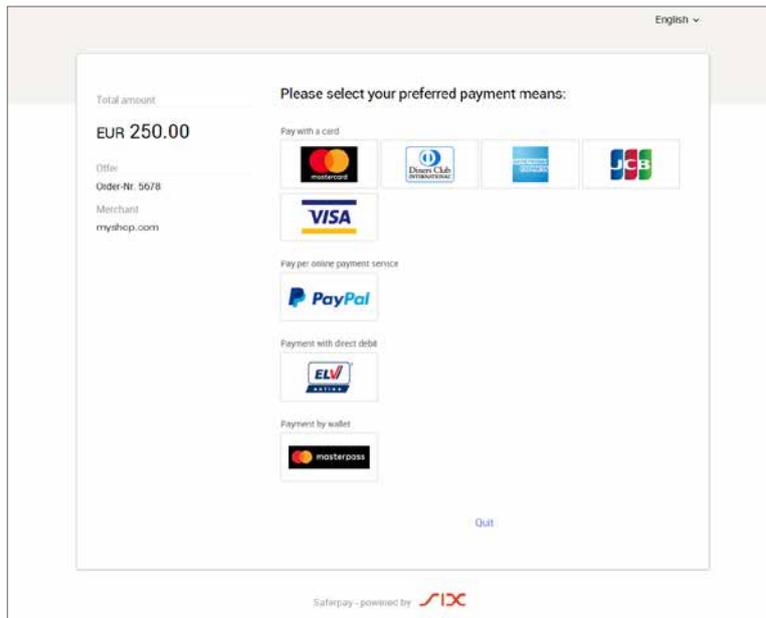

No change to your existing contract with SIX is necessary and you do not need to conclude a new acceptance agreement. There are no further costs for you associated with the implementation of Masterpass and the agreed conditions, depending on the card used, will remain the same.

Masterpass sends you the card details following the payment so that you can carry out the transaction using your normal card process. As no third party or other entity needs to be involved, the processes remain clean so you can quickly and easily offer an additional payment option without any impact on your day-to-day business.

How does the connection to your online shop work?

Masterpass is automatically activated free of charge on your standard payment page (Safepay payment page). You are not required to make any payment associated with the connection to Masterpass.

If you use an external connection to Safepay from your shop, simply contact your provider for an update.

This is how your customers pay with Masterpass in your shop

Masterpass appears as another payment method on your Safepay payment page. However, your customers will only be offered the payment methods in the wallet, which they already use in your webshop.
