Saferpay

The secure payment solution for your webshop
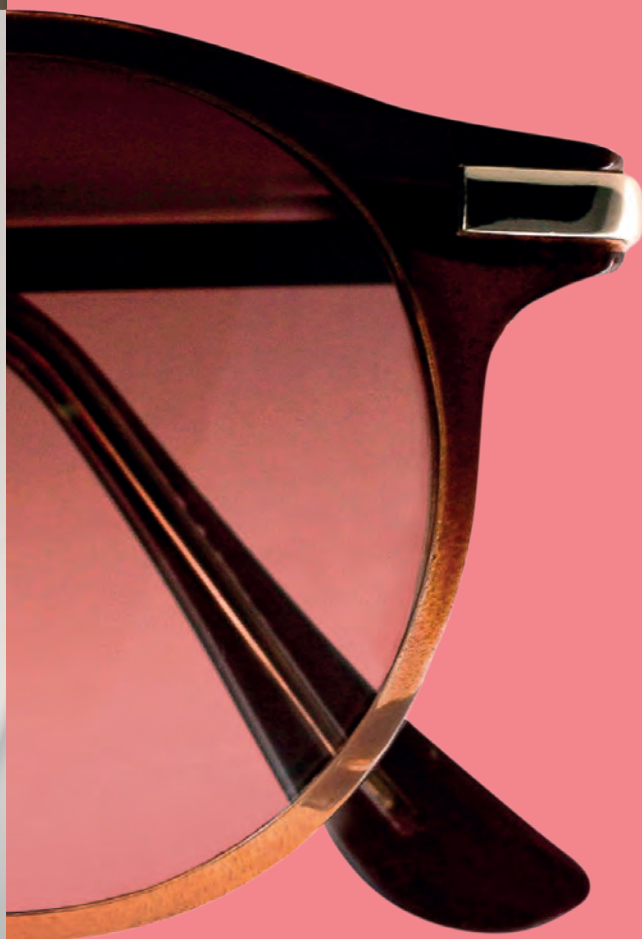

Online payment system Saferpay

With Saferpay, we offer merchants a comprehensive online payment system for simple and secure payment processing on the Internet.

A single interface allows you to process all common national and international payment methods.
The e-commerce solution can be integrated quickly and flexibly into the most webshop systems with just a few clicks.
Offer your customers the right mix of means of payments and look forward to higher sales
and fewer abandoned purchases on your checkout page.

#1

FLEXIBLE

Via Saferpay, you can offer your customers a new payment method at any time, remove an existing one or change card processor.

#2

EASY

Integrate Saferpay into your e-shop application at minimal expense and in doing so "outsource" the whole payment gateway infrastructure, maintenance and operation.

#3

SECURE

Saferpay supports all major safety standards and offers you, as an online merchant, the right methods so that payments in your shop can be processed as securely as possible.

WEBSHOP

CALL CENTER ↔ SAFERPAY ↔ MEANS OF PAYMENT

MOBILE

LIB FOR WaWi AND ERP SYSTEMS
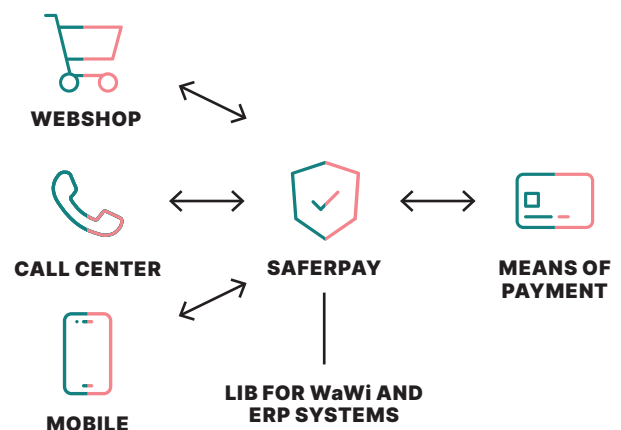

Saferpay extensions

You can supplement the Saferpay packages already available with the following extensions and services.

Responsive Design
Whether it be tablets, PC's or smartphones, the view of the Saferpay payment page adjusts to all required display sizes thanks to its responsive design.

Saferpay Backoffice
The administration interface for managing Saferpay accounts and payment transactions.

Saferpay Fields
Seamless and simple integration of form fields allows you to create custom payment forms or checkouts, reducing abandoned purchases and increasing conversion rates.

Payment and Management API
The modern background payment processing interface for shop, ERP or merchandise management systems.

Saferpay Batch Processing
The module for processing credit card and direct debit payments for file submission (batch processing).

Saferpay Secure Card Data
The extension module for the secure, PCI-compliant use and storage of credit card data.

Saferpay Risk Management
An additional package with extended services for the prevention of fraud.

Dynamic Currency Conversion (DCC)
With DCC, the automatic currency conversion, your foreign customers can choose to either pay in their card's currency or in the respective local currency. And you benefit from additional revenue.

Saferpay Plugins
Plugins available for all standard shop systems (e.g. PrestaShop, SAP Commerce Cloud or ePages).

Maximum security

Offer your customers the maximum possible level of security. At the same time, we offer protection from payment defaults since it is also about your success and the sales your business makes.

PCI DSS

Via Saferpay, you can process all credit card data securely in accordance with PCI DSS (Payment Card Industry Data Security Standard). PCI is the global security standard for international credit card organisations.

Risk Management & Fraud Prevention

Use Saferpay Risk Management as an extension to Saferpay payment solutions and fraud prevention for AI-based risk assessment of transactions.

Card verification number CVV2/CVC2

The Card Verification Value from Visa (CVV2) and the Card Verification Code from Mastercard (CVC2) are encrypted verification numbers to protect against the misuse of credit cards on the Internet. The card verification number serves as a security feature for the online retailer to ensure the customer is in possession of the card.

3-D Secure

Saferpay supports the 3-D Secure technology used by the credit card organisations Visa, Mastercard, Diners Club International and American Express for secure credit card payments on the Internet. Visa operates this service under the brand name "Visa Secure", Mastercard under "Mastercard Identity Check", American Express under "SafeKey" and Diners Club International under the label "ProtectBuy".

3-D Secure 2 and PSD2

Since 2019, Saferpay has supported the compulsory processing of transactions in accordance with the new 3-D Secure 2 security standard, which enables strong customer authentication when paying on the Internet. This enables you to comply with the new requirements of the second EU Payment Services Directive (PSD2).

Multiple means of payment

With Saferpay, you can offer your customers all major payment methods in your webshop. Credit and debit cards, customer cards and online transfers.
