

PRIMUS clever

Reduced to the essential – inexpensive price

Thanks to modular components, you choose and pay only what you actually need. PRIMUS clever is the versatile vending machine terminal from SIX Payment Services and PayTec.

With its compact construction without a PINpad (keypad), there is plenty of room for the PRIMUS clever in any vending machine. Paying small amounts without PIN entry makes shopping at your vending machine faster and easier.

The requirements for the payment function at vending machines are as wide ranging as the products and services offered. This involves not only factors such as amount and vending machine size. The PRIMUS clever meets your requirements: You can determine for yourself what you need and benefit from an attractive price; whether this includes a separate contactless, insertion reader or a combination of both.

Pay faster with a card

With the compact construction without a PINpad, the vending machine terminal is targeted towards rapid payment. Your customer does not need to enter a PIN,

which enables even easier payment. PRIMUS clever is the answer from SIX to cumbersome payment with cash money.

Ideal for small amounts

PRIMUS clever is particularly suited for purchases under CHF 40 resp. EUR 20. There is a limit to paying higher amounts with PRIMUS clever. Do you offer more expensive products in your vending machines? Contact us and we will advise you about the appropriate choice of terminal.

Both inside and out

Its robust and compact construction makes PRIMUS clever an all-rounder. Whether integrated into a beverage vending machine or installed externally in tight spaces on a car park ticketing machine, PRIMUS clever functions reliably. It processes card payments securely with EMV chip card technology and a PCI certificate.

Maximum flexibility

Choose the PRIMUS clever to meet your requirements:

1 With a contactless reader

With this version, you are aiming for fast, contactless paying.

2 With a contactless and insertion reader

Allow your customers maximum flexibility. With both readers at their disposal, they can decide how they prefer to pay.

3 With an insertion reader

With an insertion reader you are choosing proven card acceptance – only faster with elimination of PIN entry.

Advantages for you:

- You choose what you actually need and therefore benefit from an attractive price.
- PRIMUS clever works reliably both inside and out with its robust construction.
- You save when it comes to the service technician and reduce operating costs with the remote maintenance system.
- Convincing in terms of security: All components meet the strictest security standards set by the international card organizations (PCI 3.x certified).

Technical overview of the PRIMUS clever

PSI module	
Dimensions (L x H x D)	85 x 113 x 39 mm
Weight	320 g
Power supply	12V.. 24V AC 14V.. 42V DC 12V DC 5V DC (optional)
External interfaces	USB, cash register, Ethernet
Communication module	LAN, GPRS, WiFi
SAM ports	2
IP protection level	IP30
Insertion reader	
Dimensions (L x H x D)	81 x 72 x 160 mm
Installation depth	144 mm
Minimum front panel cutout	68 x 50 mm
Maximum front panel cutout	75 x 57 mm
Weight	660 g
Power supply	12V DC 5V DC (optional)
IP protection level	IP34
Contactless reader (RFID)	
Dimensions (L x H x D)	82 x 80 x 31 mm
Installation depth	25 mm
Required front panel cutout	54 x 64 mm
Weight	110 g
Power supply	12V DC
IP protection level	IP65
Environmental conditions	
Temperature	-20 °C to +50 °C
Humidity	85% (non-condensing)
