

The most important Ingenico EFT930 functions

Prerequisites

All operations described in this guide are related to the payment application (ep2). It is activated automatically in case of terminal restart or usage of the card. If it is inactive, it can be activated this way:

1.	Push the <f> button. "Functions" option is activated.</f>	F
2.	Push <1> or the <green> button. "EP2" option is activated.</green>	1 EP2 or (green button)

Purchase/Payment

1.	Push the <f> button. "Transactions" option is activated.</f>	E
2.	Push <1> or the <green> button. "Payment" option is activated.</green>	1 Payment or (green button)
3.	Enter the amount and confirm with the <green> button. The amount is separated (e.g. euros/cents) with a comma.</green>	Amount (green button)
4.	Depending on the type of card, the card must be slipped through the magnetic swipe reader, inserted into the chip card reader or tapped to the contactless reader. If the customer uses the wrong reader for his or her card, that person is instructed to use the proper reader.	
5.	The amount is displayed for the customer to read. When using a card with an associated PIN, the customer is instructed to enter the PIN code (4 to 12 digits) and confirm with the <green> button. When using a card without a PIN, only the amount must be confirmed. The transaction can be interrupted by pressing the <red> button.</red></green>	PIN (green button)
6.	OPTIONAL: if CashBack is enabled and supported by card, cashback amount would be prompted. Amount can be entered (not greater than 200 PLN) or left empty and confirmed with the <green> button.</green>	CashBack amount

,

7.	OPTIONAL: if DCC is enabled and the card is foreign, the cardholder can choose if he/she wants to pay in his/hers or local currency. The cardholder chooses the right option with <up down=""> button and confirm with the <green> button.</green></up>	(green button)
8.	Payments are processed and, when appropriate, authorized online. Chip cards: The card must remain inserted in the chip reader during the transaction until the instructions appear to remove the card.	
9.	Receipt is printed out. Please follow the terminal's instructions: If the customer's signature is necessary, request that he or she provide one. If the transaction is contactless and the amount is below the defined limit, receipt is optional.	
10.	To print a copy of the receipt: Push the <f4> or <green> button. To not print a copy of the receipt: Push the <f1> or <red> button. If no button is pushed, a copy is automatically printed after 10 seconds.</red></f1></green></f4>	F4 F1

Reversal/Cancelation

1.	Push the <f> button. "Transactions" option is activated.</f>	F
2.	Push <2>. "Reversal" is activated.	2 Reversal
3.	Enter the terminal's password and confirm with the <green> button. (Password is provided during the installation by the person installing terminal.)</green>	Password (green button)
