

GASTRO ComfortPay

Mobile payments, integrated environments

Make your service perfect with GASTRO ComfortPay: Relieve your staff and give your guests a choice while paying.

What is GASTRO ComfortPay?

In a nutshell, GASTRO ComfortPay combines the advantages of mobile payments with the convenient features of cash register integrated solutions.

Restaurant and hotel owners know this problem all too well: Card payments processed through a mobile terminal must be manually reconciled with the cash register balance at the end of each shift. This is time consuming, error prone and can be easily forgotten. That is why we developed GASTRO ComfortPay. With this new software solution, our xentissimo MOBILE payment terminal communicates directly with your cash register system, which eliminates the need for manual reconciliation. The terminal exchanges all necessary data with your cash register system without any cable connection. The only requirement: You have WLAN installed and your cash register application is properly configured.

The advantages of GASTRO ComfortPay for restaurants and hotels

Mobile payments & cash register integration in one

GASTRO ComfortPay combines the advantages of mobile payments with the convenient features of cash register integrated solutions.

Separate checks for each guest

GASTRO ComfortPay enables multiple guests to split a check.

Mixed payments with card and cash

Even mixed payments (part card/part cash) are possible – one guest pays with his/her card and the other in cash.

Elimination of payment errors

A check with split payments such as “part card/part cash” can only be completed if all partial payments exactly equal the outstanding balance.

Easy handling for the service staff

The check is prepared at the cash register and can then easily be accessed by the service staff at the table via xentissimo MOBILE. The payment amount is then transmitted wirelessly to the cash register to complete the payment of the check.

Less time, fewer mistakes

The time-consuming manual reconciliation of mobile card payments with the cash register balance is no longer necessary, thus preventing annoying typing errors.

Simple to install

In addition to the xentissimo MOBILE terminal, you only need a software update for your cash register application as well as WLAN, which enables wireless communication between the cash register and the terminal.

The advantages of GASTRO ComfortPay for your guests

Fast and convenient

Guests can pay their check quickly and easily at the table.

Card, cash or both

Via the split check feature guests can divide the total amount as they choose. Guests also have the option of paying their portion of the check with a credit card, debit card or cash.

Familiar and secure

Just like with conventional card payments, guests enter their PIN or sign the sales slip.
